

Project Design Phase-II

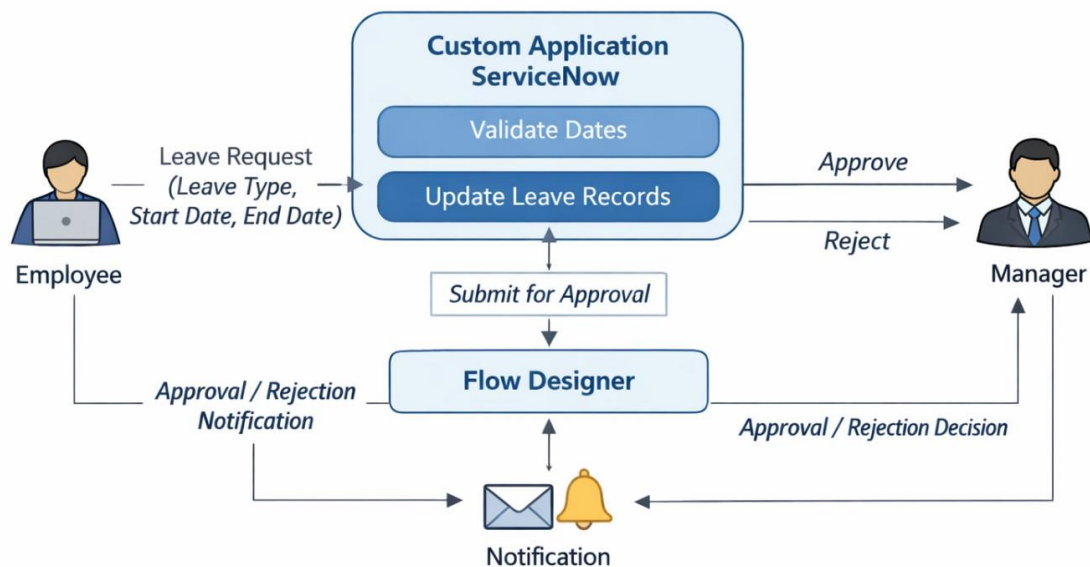

Data Flow Diagram & User Stories

Date	30 June 2026
Roll Number	23A51A42A4
Project Name	Leave Approval System
Maximum Marks	4 Marks

Data Flow Diagram:

The Leave Approval System automates the process of managing employee leave requests through ServiceNow. Employees submit leave details such as type, start date, and end date. The system validates the dates to prevent errors and routes the request to the manager using Flow Designer. The manager reviews and either approves or rejects the request, after which the system sends a notification to the employee. This workflow ensures accuracy, transparency, and efficiency in leave management.
